Trees down along Gratiot Avenue.				
A cold front moved through southeast Michigan during the early evening hours of June 6th. With temperature climbing into the lower 90s during the afternoon, the airmass became quite unstable, leading to numerous severe thunderstorms which produced damaging winds. The strongest thunderstorm winds occurred at Howell and Saginaw, where winds reached at least 70 mph. As such, Saginaw saw the greatest amount of damage and power outages, with 12,000 residents losing electricity.

Large tree limbs reported down.				
A derecho swept through southeast Michigan on Sunday afternoon June 8th. This brought widespread wind damage and localized large hail to the region. Enhanced wind damage, due to winds as high as 85 mph, affected Shiaweeesee, Livingston, Genesee, Oakland, Lapeer, Macomb and St. Clair counties. Thousands of trees were lost, with significant property damage occurring as trees fell on houses and cars. This is the most widespread damage to occur over southeast Michigan in over a decade, as over 300,000 residents lost power. Over 10,000 residents were without power for a week or more, indicative of the extent of damage, which was estimated to be 100 million dollars.				
LENAWEE COUNTY --- 0.5 W ADRIAN [41.90, -84.04]
